# Sheeptags®

- Designed not to catch on fencing

## I-Tag®

- Electronic Eartag - ISO 11784 / 11785

### Sheep Version

Based on the Suretag this lightweight tag will fit most needle type applicators. Carrying a purpose wound copper coil and a Philips Hi-Tag S chip, the I-Tag for sheep is an FDX-B 134.2Khz transponder produced to ISO Standard 11784/5. Available laser printed and encoded with the same details.

- WH 2009

## Post Breeder

# Rototag®

Made from the highest quality Nylon for over 40 years. Many have tried to copy the Rototag with low-quality materials but don't be fooled, there is no substitute.

The Rototag is a tried and proven cost-effective method of identifying breeding stock.

Lifetime Applicator  
GUARANTEE

# Tagomatic®

The Tagomatic is a simple one-piece tag. Fast to fit and easy to apply, this low-cost tag is the preferred option for farmers seeking rapid identification on a budget for movement or slaughter.

Produced from a special flexible material, all tags are laser marked to order and supplied in joined strips for ease of application. Blank tags cannot be self-marked.

# Supertag<sup>®</sup>

Colour Range

- Designed not to catch on fencing
- Rotates 360° Out of Trouble
- Mix 'n Match all sizes, choose male or female

Made from the highest quality Polyurethane with a unique Impact modified self-piercing pin. Once applied the Supertag swings freely and can rotate a full 360° out of trouble. Inbuilt solid pin on male Supertags reduces tears when applying tags as there are no needles to snag the applicator when being removed.

U.V. Stabilised and Microbial resistant, Supertags come in 8 bright colours and can be supplied Blank for self-marking. Laser Marked as required.

First developed for the Australian Livestock Market in 1984 the Supertag has rapidly become accepted as one of the most effective and unique methods of identification.
