# Supertag®

Colour Range

- Designed not to catch on fencing
- Rotates 360° Out of Trouble
- Mix 'n Match all sizes, choose male or female

Actual Size

Made from the highest quality Polyurethane with a unique Impact modified self-piercing pin. Once applied the Supertag swings freely and can rotate a full 360° out of trouble. Inbuilt solid pin on male Supertags reduces tears when applying tags as there are no needles to snag the applicator when being removed.

U.V. Stabilised and Microbial resistant, Supertags come in 8 bright colours and can be supplied Blank for self-marking. Laser Marked as required.

First developed for the Australian Livestock Market in 1984 the Supertag has rapidly become accepted as one of the most effective and unique methods of identification.

Designed not to catch on fencing

### Self Piercing

The first and only tag to combine flexibility with a unique self-piercing pin. Piercing the ear cleanly and leaving no shreds of tissue. No metal pin to snag applicator as it's being removed from the ear, reducing blood and tissue damage.

### Rotates 360° Out of Trouble

Especially designed to swing freely, this rotation action allows the Supertag to swing completely around and out of trouble.

### No Needle Applicator

No needle in the applicator as each tag has a solid pin which can provide long term lifetime identification and reduce tags loss. Quick & simple to fit every time.

### UV Stabilised - Weatherproof

Made from the highest grade of polyurethane, each Supertag® is available in 9 fade resistant UV Stabilised colours. Each available with Longlife Laser printing.
